PROFILE

I have 8 months of professional experience as a Game Designer, specializing in systems and level design. I enjoy creating balanced gameplay mechanics, engaging player progression, and immersive puzzle experiences for mobile and PC games using Unity and Unreal Engine. I am skilled in gameplay balancing, documentation, and designing player-focused experiences that combine creative storytelling with data-driven design principles. I am passionate about building memorable gameplay experiences through strong systems thinking and collaborative development.

SOFTWARE & TOOLS

- Unity (2D/3D)
- Adobe Photoshop
- Maya
- Microsoft Excel
- Unreal Engine
- Miro
- Notion
- Docs

WORK EXPERIENCE

Easewin

- November 2025 - Present

Game Design Intern

- Pitched original game concepts to the team and stakeholders.
- Created clear and complete GDDs for gameplay, levels, and systems.
- Designed levels and puzzles with balanced difficulty and flow.
- Coordinated with artists and developers to align design execution.

Resurgence Interactive

- June 2025 - July 2025

Game Design Intern

- Designed and balanced core vehicle mechanics (dash, ramming, boost jump).
- Created sheets for car stats, speed curves, and upgrade formulas.
- Handled GDDs and Documents
- Collaborated across design and programming to maintain design integrity during implementation.

PROJECTS

Tatya

- Pitched and conceptualized core gameplay ideas, guiding the project's direction.
- Designed puzzle and riddle systems with scalable logic and Marathi-English localization.
- Balanced difficulty using the "Patience Bar" system to create tension and player control.
- Game nominated for the Seamedu Game Awards 2025.

Die Away

- Designed the core dice movement system.
- Created gameplay and puzzle logic.
- Designed progression and level structure.
- Worked on UX and gameplay readability.
